

FACEPLATES

For AMP NETCONNECT SL Series, E Series and KL Series Jacks

With its modern design, TE Connectivity's faceplates improve the appearance of outlet areas that house data and telephony connectors in everything from classrooms and hospitals to offices and homes.

Engineered for residential and commercial applications, our single gang faceplates feature a sleek 2¾" x 4½" profile and other features not available with traditional models. There is a wide range of port configurations, including single gang in 1-, 2-, 3-, 4- and 6-port and double gang in 6-, 8- and 12-port. Faceplates mount to standard ANSI/NEMA outlet boxes with 3.28 inch [83.34 mm] centerline mounting dimensions (distance between screws).

Labeling and non-labeled options are available. Labeling models feature mold-over icon and leveling and convex labels for maximum visibility in low density areas. The larger radius on the faceplate edge and the convex shape of the label covers allow labels to be more easily viewed from above when faceplates are behind furniture. The contour flip down label also stays attached to the faceplate for easy label replacement. Extender kits can be used to add 0.5 inches of space between the mounting surface and the faceplate.
